

Neuropsychological Testing, Assessment & Reporting

*There is a faster,
more cost effective
and accurate
alternative*

If you are involved in personal injury and medical negligence claims then you will recognise the benefits of using our highly efficient Neuropsychological Screening and Reporting Medico-Legal service.

For just \$450 we can screen for Traumatic Brain Injury. Fourteen well-validated neuropsychometric tests can be completed in one hour. Full comparative results are completed in just three days. Imagine knowing whether you have a case in just three days!

If you then decide that you need a full psychological report (including neuropsychological testing) it will only cost \$2,000, and you will have the results in a couple of weeks!

At Psych n Soul our medico-legal reporting service is designed specifically to meet the needs of the legal profession, and offers levels of efficiency, speed and accuracy, which are simply unmatched in the industry.

How do we do it? We combine over 10 years experience (and hundreds of reports) with groundbreaking technology. The INTEG NEURO™ is a fully automated series of computer tests that reflect an individualised Cognitive Performance Profile (including sensory-motor, memory, attention, verbal fluency, impulsivity and executive functions). Precise performance analysis is empowered by the world's first total quality controlled international database on the human brain.

A screening report is generated highlighting the statistical likelihood of your client's brain function being significantly different from the normative sample in the international database. It includes estimates of pre-morbid intelligence and likelihood of Malingering. This statistically derived evidence-based report means costs are contained for your client and you can make informed and faster decisions regarding litigation.

If you want a detailed report we interview both the client and people who know the client, conduct behavioural observations, a mental status examination and detailed psychometric testing of psychological functioning and assessment of Whole Person Impairment, incorporating and integrating the results of the neuropsychological testing. These reports are regularly served on defendant solicitors.

If you would like to know within a few days at minimal cost if your client warrants a detailed neuropsychological/psychological report, then contact Psych n Soul on (02) 9280 2070 or email ross@addictiontreatment.com.au
